

AI Career Counsellor - Project Report

Name: Priyansh Bhatt

Introduction:

AI Career Counsellor is a machine learning application developed using Python and Streamlit. It predicts suitable career options based on user interests.

Objective:

To recommend career paths using Natural Language Processing and machine learning.

Technologies Used:

- Python
- Streamlit
- Scikit-learn
- Pandas
- TF-IDF

Methodology:

User interests are converted into numerical vectors using TF-IDF. A Logistic Regression model predicts suitable career options.

Features:

- Career prediction
- Interactive UI
- Fast recommendations
- NLP-based analysis

Conclusion:

This project demonstrates how AI and NLP can be used for intelligent career recommendation systems.
